Portfolio

MERN Stack Developer with 1 year of experience building **web applications** using **React.js, Next.js, Node.js, MongoDB.** Experienced in developing secure, **high-performance** application with modern UI/UX, real-time features, and payment integrations. Skilled in clean code and **performance optimization**. Comfortable owning projects end-to-end from development to deployment.

Experience

MERN Stack developer • NextHome • Lahore, Pakistan — Jan '25 – Present

- Developed a **Real Estate** booking platform enabling users to **create bookings** and manage reservations.
- Built responsive interfaces using **React.js and Tailwind Css**, ensuring smooth experience across different devices.
- **Optimized platform performance** by implementing lazy loading for images, efficient database queries, and responsive design principles, improving overall user experience.
- Designed and implemented **RESTful APIs** using **Node.js, Express, and MongoDB** for property management, bookings, authentication, and data retrieval.
- Integrated **SendGrid** and **NodeMailer** for automated booking confirmations, notifications, and newsletter subscriptions.

Projects

ASAANHOME | Link

- Developed a full-stack **Real Estate** booking platform using **React.js**, **Node.js**, **Express**, and **MongoDB**, enabling users to browse properties, create bookings, and manage reservations.
- Built responsive and interfaces using **React.js and Tailwind Css**, ensuring smooth experience across devices.
- Gained hands-on experience with **production debugging**, cloud infrastructure, and real-world deployment challenges.

Multi-Vendor E-Commerce Platform | Link

- Developed a **full-stack multi-vendor e-commerce platform** using **React**, **Node.js, Express**, and **MongoDB**, enabling buyers to shop, sellers to manage stores, and admins to oversee operations.
- Built **role-based dashboards** for admins, sellers, and buyers with **secure JWT authentication**, session management, and access control for each user type.
- Integrated **Stripe payment gateway** and implemented **real-time communication** using **Socket.io**.

Learning Management System (LMS) | Link

- Developed a full-stack LMS application with **Next.js, TypeScript, Node.js, Redis, MongoDB, and Socket.io**, featuring responsive UI and scalable backend
- Designed **secure course enrollment, JWT authentication, and role-based access** for students and admins.
- Integrated **Stripe gateway** for checkout and used **Redis caching** to improve data retrieval and boost load performance.
- Implemented **real-time notifications** and live updates using **Socket.io** to enhance user engagement and interactive learning experience.

Skills

Frontend: React.js, Next.js, Redux, JavaScript, TypeScript, Tailwind Css, Shadcn/UI
Backend: Node.js, Express.js, JWT, OAuth, Authentication, Authorization, RESTful API, Socket IO
Databases: MongoDB, Redis
DevOps: Git, Github, Postman, Vercel, Render
Payments: Stripe
Languages: English

Education

Virtual University of Pakistan | Bachelor of Computer Science
